### Arafat Pledges Good Conduct, Aide Says

By John Kifner
New York Times Service

AMMAN, Jordan -- The Palestine Liberation Organization has given a good conduct pledge to King Hussein to avoid such embarrassing incidents as the Achille Lauro hijacking, Palestinian and Jordanian sources said Wednesday. precipitated what had been seen as

"We agreed we shouldn't carry out any act which could hurt the Feb. 11 agreement," said Hani al-Hassan, a top political aide of Yasser Arafat, the PLO chairman, after two days of crucial meetings here. Mr. Hassan was referring to the accord between Jordan and the PLO designed to lead to a Middle East peace settlement.

The promise - somewhat tenuconcrete achievement of the vaunted confrontation between Mr. AraPLO from any negotiations.

The Jordanian-PLO alliance meetings, according to both Palesthus appeared to have survived finian and Jordanian sources, of King Hussein's irritation at the Palany attempt by the king to wring estinian organization over the commitments from Mr. Arafat to Achille Lauro hijacking and the such American conditions for entry breakdown of a London meeting to the negotiating process as recog-

a showdown meeting here.

The bottom line, both Arab sources and Western diplomats said, was that neither side at this point was able to risk scuttling the alliance. Thus the uneasy relation-

ship would continue. The results also appeared to rule mittent clashes between Christian ous, given the volatile nature of the sein of the offer of separate peace and Moslem militiamen on the Middle East and the rather amortalks made by the Israeli prime

between Palestinian representa- nition of Israel or renunciation of tives and the British foreign secre-violence, Palestinian and Jordanitary, Sir Geoffrey Howe, which an sources said. Instead, these sources said, much

of the discussion focused on the need to tighten up responsibility in Mr. Arafat's unwieldy apparatus.

The result was a relief for Mr. Arafat and his aides, who had arrived here prepared for a major confrontation and fearful they would be thrown out of their bases in Jordan and, indeed, out of the peace efforts that have given them a measure of respectability.

"This is a success for the PLO." Ahmed Abdul Rahman, the PLO

diluting the Luxembourg language. with leaders of the five parties that formed his previous government. Mr. Craxi announced that "the crisis has been overcome."

Mr. Craxi said the agreement envisaged using a rare constitutional formula that, in effect, would reverse his resignation Oct. 17 and submit his original government and mandate to a parliamentary vote of confidence next week. A positive vote has already been assured in

the negotiations with party leaders. Mr. Craxi's decision to allow a Palestinian leader, Mohammed Abbas, to leave Italy despite U.S. demands that he be arrested and held for extradition as the mastermind of the Achille Lauro hijacking led to his government's col-lapse. Defense Minister Giovarni Spadolini, the pro-American leader of the Republican Party, decided to pull his party's three ministers out of the coalition to protest Mr. Ab-

Mr. Spadolini apparently was persuaded to rejoin the government Wednesday when Mr. Craxi agreed to Republican demands for more consultation within the governing coalition in the future and restated Italy's commitment to oppose international terrorism and stand by its Atlantic alliance partners, especially the United States.

Although Mr. Spadolini said there were no "victors and no losers," Italian political commentators said the Republican-created

leaderships of the various coalition resume the government, he would see President Francesco Cossiga and withdraw his resignation submitted Oct. 17.

That would open the door for Mr. Craxi to simply put his contin-uation as prime minister before a vote of confidence in Parliament next week after a debate on the

liament was urged on Mr. Čraxi by means of speeding up the formation of a new government so it the government crisis bog down in

bus' release.

government crisis had left the party dangerously isolated, threatened new parliamentary elections, and endangered pending financial and government reforms dear to the party. ### WORLD BRIEFS

Airlines Call for Tougher Security

HAMBURG (Reuters) — The world's major airlines, buffered it rising costs and a series of air disasters, called Wednesday for toughe.

The International Air Transport Association, which groups 140 carrisecurity ers, said at the end of the group's annual meeting that its members had adopted a security resolution that will now go to its Mentreal security office for final approval. The details were not made public. Delegates of the details were not made public. emphasized that a final decision for action rests with national govern-

Airline representatives said additional financial burdens from tighter security and rising fuel costs were likely to strain airline budgets and increase fares. The association said it expected members' profits this year to fall to \$100 million from \$500 million in 1984. Next year, the industry

### U.S. Farm Banks Seek \$6-Billion Loan

WASHINGTON (AP) - The Farm Credit System asked Congress an Wednesday for \$6 billion to bail out the agency over the next few years, saying it had "no other choice."

The request by the private cooperative of farm banks is coupled with measures providing tighter regulation of the system and a more central-

Without government financial assistance, "the system cannot survive the radical transition under way in agriculture," Ray Moss Tucker, chairman of the Farm Credit Council, the system's lobbying organization said at a Lorent Architecture. tion, said at a House Agriculture Committee hearing. The 37-bank system is the largest farm lender in the United States, with \$70 billion in loans outstanding. It lost \$522 million in the third quarter.

### Sweden Plays Down Collision of Ships STOCKHOLM (Reuters) — The Swedish government sought Wednesday to play down an incident in the Baltic Sea on Thesday in which a Soviet minesweeper was involved in a collision with a Swedish intelligen-

ce-gathering vessel.

Prime Minister Olof Palme said that the collision, in international waters, had not been serious. "There is no reason to dramatize the incident." he said.

The defense staff said that the collision occurred while the 1.800-ton Swedish vessel Orion was engaged in routine monitoring of Soviet naval maneuvers southeast of the Swedish island of Gotland. "The Soviet minesweeper and Orion had been maneuvering near each other for several hours when the collision occurred," it said. The Orion suffered minor damage and there were no injuries.

#### Nakasone Vows to Limit Military Fund

TOKYO (Reuters) - Prime Minister Yasuhiro Nakasone promised Wednesday to keep Ja-pan's military spending within I percent of the country's gross national product, at least for one year.

Opposition parties in the Diet, Japan's parliament, extracted the pledge at a session of the budget committee. The committee was discussing a five-year program of military spending, which begins in April and had seemed likely to breach the I percent ceiling imposed in 1976.

Under pressure from the United States, Mr. Nakasone had been seeking to push military spending above the limit.

### Botha Party Loses Seat in By-Election JOHANNESBURG (Combined Dispatches) — A hard-line South African party defeated the ruling National Party on Wednesday in one of

five by-elections that were being viewed as a test of President Pieter W. Botha's racial policies, election officials said. The ultraright Herstigte Nasionale Party defeated the National Party

in the Sasolburg constituency by 367 votes to win its first parliamentary seat. In the town of Springs; the rightist Conservative Party came within 749 votes of upsetting the National Party candidate. In 1981, the National Party won the Springs seat by 2,481 votes. The National Party retained its Port Natal constituency by 2,205 votes. The by-elections were being held in five towns to fall vacancies in the

all-white chamber of South Africa's tricameral, segregated Parliament. The National Party had held all five seats.

The Gennens and NASA have worked very well as a team.
West German space officials echoed much the same sentiment about the cooperation. West Ger-many has paid \$65 million to char-

Since spring scores of West German scientists and engineers have been working at the space center, making German an even more common language there than it was more than 20 years ago when Werner von Brann and other German scientists for a while formed the nucleus of the infant U.S. space

The laboratory, called Spacelab and built by the European Space Agency, an international consortium, consists of a room lined with racies of scientific equipment, each piece specially built to carry out one experiment.

Most of the experiments were designed by German researchers but a number are from France, Spain, Italy, Britain, the Nether-lands, Belgium, Switzerland and the United States. All are intended to take advantage of the essentially weightless conditions of space to study various processes that are normally affected by gravity.

The largest class of experiments is in materials science, where one goal is to develop lighter and stronger metals and other materials. When molten metal cools and hardens, gravity alters its crystal structure. Without gravity, some scientists believe, such substances may crystallize with a more perfect arrangement of atoms.

The crew will be led by Henry W. Hartsfield, the commander, and Steven R. Nagel, the pilot. In addi-tion there will be three U.S. mission Ground control remains at the specialists, Bonnie J. Dunbar, James F. Buchli and Guion S. Blo-

After Interview, State Dept. Says He Doesn't Want Asylum

New York Times Service

WASHINGTON - A Soviet seaman who was captured after jumping from his ship into the Mississippi River has assured U.S. officials that he does not want political asylum and will be allowed to return to the Soviet Union, according to the State Department.

The announcement Tuesday came after extensive discussions between the seaman and American officials. The State Department said that the seaman. Miroslay Medvid, had satisfied U.S. officials that he wanted to return to the Soviet Union and was now back aboard his ship near New Orleans.

The decision averted a potentially divisive incident three weeks before the Geneva summit meeting between President Ronald Reagan and the Soviet leader, Mikhail S Gorbachev.

U.S. officials had refused to let the seaman's ship, the M.V. Marshal Konyev, leave its anchorage while diplomats were determining Mr. Medvid's intentions.

The State Department said that Mr. Medvid had signed a Russianlanguage statement late Tuesday afternoon confirming his wishes to return to the Soviet Union.

"He was alert and was determined by U.S. medical, legal and other representatives to be compe-tent to make a decision concerning whether he wanted to remain in the U.S.," the State Department said. "Seaman Medvid reaffirmed his repeated statements that he wished to return to the U.S.S.R."

"Seaman Medvid signed this statement," it said. "We then released Seaman Medvid" for return to the ship "in accordance with his wishes. The United States government considers this matter closed."

The incident began when Mr. Medvid jumped from the moving freighter into the Mississippi River and was caught by U.S. authorities. Within hours, U.S. Border Patrol agents decided to return the sea- PHILIPS that, I don't see anything he can man to the vessel despite his protests. INTERNATIONAL REAL ESTATE

In his brief apprenticeship under his mother, Mr. Gandhi did little to develop an independent identity. After the assassination, when the ruling Congress (I) Party chose him weak and uncertain.

In the subsequent parliamentary election campaign, Mr. Gandhi infuriated his opponents by questioning their commitment to Indian national unity. In December, the Congress (I) Party won 80 percent of the seats in Parliament, an unnaralleled sweep.

Perhaps because the Congress (I) Party won only 49 percent of the actual vote, Mr. Gandhi took a more conciliatory approach almost immediately after the election. Then he signaled his willingness to break from the past by removing ily feel that the prime minister's most of his mother's key advisers style is rooted in personality.

from his inner circle. In a recent interview, Mr. Gandhi offered his first public criticism of the national emergency that his mother imposed from 1975 to 1977. straightforward. during which civil liberties were suspended and many politicians were iailed

Mr. Gandhi said that "a lot of things" had gone wrong because his mother had "lost control" dur-

President Suharto, left, meets with Yakov P. Ryabov, the Soviet deputy prime minister.

### Suharto Rejects \$180-Million Soviet Loan

JAKARTA — Indonesia has refused a Soviet offer of a \$180million loan to build three hospitals, the economy minister, Ali Wardhana, said Wednesday.

He made the comments after a meeting between the Soviet deputy prime minister, Yakor P.

Mr. Wardhana said that Indonesia could not agree to the loan terms Moscow had offered, but he declined to give details. The Soviet minister said he and Mr. Suharto had held long talks Wednesday on ways of increasing trade and economic coopera-

### Amid Fanfare, 45 Philippine Rebels Surrender By Abby Tan Tashington Post Service

DIPOLOG, Philippines — The sleepy city of Dipolog, capital of Zamboanga Del None province in Western Mindanao, woke up ballot boxes they had taken Wednesday when 45 rebels of the previous election exercise. Communist New People's Army and more than 3,000 former sympathizers converged for a public surrender to government forces.

It was part of a recently announced public relations campaign intended to persuade the United States and others that the government is in control of the insurgency

The official Philippine News Agency said that the rally constituted the biggest Communist surrender on Mindanao this year, "virtually confirming" a government announcement several days ago that the rebels were "surrendering in droves.

The assertion contrasted sharply, however, with a recent statement by the acting Philippine mili-General Fidel V. Ramos, who said that the rebel force had grown to as Marcos.

In Manila, meanwhile, President Ferdinand E. Marcos raised the need to define the obligations of the United States under its military bases agreement with the Philip-pines. And in Moscow, his wife, Imelda, announced the opening of a new era of friendship and mutual

## A Joint Appeal to Reagan and Gorbachev

This joint statement is addressed to Ronald Reagan and Mikhail Gorbachev. It was drafted earlier this year, completed in New York last week and made available to The New York Times by the Swedish government. The statement was signed by President Raúl Alfonsín of Argentina, President Miguel de la Madrid of Mexico, Prime Minister Olof Palme of Sweden, Prime Minister Rajiv Gandhi of India, President Julius Nyerere of Tanzania and Prime Minister Andreas Papandreou of Greece.

during the present year your governments have initiated in Geneva negotiations covering both

space and nuclear arms to be considered in their

HE world's highest expectations are focused on your meeting in Geneva next month. All peoples and governments hope that you will be able to stop the deepening of tensions of the last years, opening an era of peace and security for humanity.

You know, as we do, that the growing stockpiles of nuclear weapons, if used, even though by accident or by miscalculation, will engulf us all in complete destruction. No interest can justify this threat to present and future generations. Hence, the prevention of nuclear war is a key issue not only for your peoples and their destinies but for all people on every continent. Since the citizens of all nations are equally threatened by the consequences of nuclear war, it is of utmost importance to us also that your meeting should create appropriate conditions and produce concrete

teps toward disarmament and peace. The tragedy of our time is that, mainly due to mutual distrust, so far it has been impossible to end the nuclear arms race. For your own security and that of all nations and human beings and in order to ensure the preservation of the planet we all share, it is of paramount importance to build mutual confidence.

Your meeting offers a historic opportunity to step boldly out of the vicious circle of the escalating arms race. We hope that through the demonstration of will to establish mutual confidence by overcoming differences, new impetus will be imparted to your bilateral negotiations and also to multilateral negotiations in Geneva, Stockholm and Vienna, We recognize as a positive development that

interrelationship. We are concerned that such negotiations have not yet produced results. We feel, however, that various recent proposals and developments seem to offer new hope that both deep cuts in the arsenals of nuclear weapons and effective measures for the prevention of an 'We propose that you suspend

all nuclear tests for a period of 12 months. Such a suspension could be extended  $\,\ldots\,$  '

arms race in outer space will now be seriously considered in the bilateral negotiations in Geneva in conformity with the conclusions we expect you to reach at your meeting.

In our Delhi declaration of January this year, we called for a complete halt in the testing. production and deployment of nuclear weapons and delivery vehicles, and of space weapons, to be immediately followed by substantial reductions in nuclear forces. This would facilitate the task of preventing an arms race in space and terminating it on Earth, ultimately eliminating nuclear arms everywhere.

Since January, some of us have had the privilege of discussing our proposals with you in person, as well as with the leaders of the other nuclear weapon states. One suggestion which we

particularly emphasized in our message from Delhi was for a halt to all nuclear weapons testing and the early conclusion of a comprehensive test ban treaty. In the light of these valuable discussions, we have decided to put forward some ideas for consideration at your meeting in Geneva.

We propose that you suspend all nuclear tests for a period of 12 months. Such a suspension could be extended or made permanent. We expect that the other nuclear weapon states also should take corresponding action.

We believe that this would improve greatly the prospects for substantive agreements and would restrain the development of new, faster and more accurate weapons, which continues unabated even as negotiations are under way.

The problems of verifying the suspension we propose are difficult, but not insurmountable. We believe that you yourselves could find a solution satisfactory to both.

If you would consider it helpful, we are ready

to offer our good offices in order to facilitate the establishment of effective verification arrangements. Third party verification could provide a high degree of certainty that testing programs have ceased. We propose to establish verification mechanisms on our territories to achieve this objective.

The responsibility entrusted to you is indeed awesome. We are convinced that the international community will support you in your endeavors. For our part, we reiterate our readiness to work together with you for the common security and survival of humanity.

The New York Times.

### Let Both Sinners Repent

A Few Hostages Benefit

America buys \$40 billion more from Japan than it sells there, but that, Japanese policymakers say, has little to do with protectionism. The real cause is the torrent of foreign capital

United States. This is the pattern.

has been seeking through her years of internal

being sucked into the American economy. They are right. Even if Japan eliminated every restraint on imports, the U.S. trade deficit would narrow by no more than \$5 billion. But try telling that to hard-pressed American manufacturers of computer chips, tractors or machine tools. They are not likely to be mollified by abstraction. They want relief in the form of tariff or quota barriers, an approach that would be ruinous for both economies.

The sound alternative is a combination of American fiscal constraint and expansion of the Japanese economy. The United States, however, is dithering; and Japan, to judge by the measures it has just announced, is not much closer to doing what needs to be done.

Japan is, like the United States, a trade sinner. America protects sugar, clothing and steel. Japan protects beef, air travel and plywood. Japan is slowly yielding to foreign pressure to reduce trade barriers, even as America is yielding to domestic pressure to raise them. But, as practically everybody agrees, Japan's

trade surplus will not melt quickly. Common sense suggests that the big Japanese trade surplus should automatically selfdestruct. Either the Japanese would spend the dollars they are accumulating, evening out the trade flow; or they would become increasingly reluctant to accumulate still more dollars. making Japanese goods more expensive to American consumers. But common sense ignores the role of thrifty Japanese savers. They are not spending their dollars but investing them in American assets. Hence the dollar lars is to make America a less attractive place in which to invest surplus savings. A recession or a nasty bout of inflation would probably do the trick. A more constructive way would be to cut the federal budget deficit, reducing Uncle Sam's need to borrow and allowing interest rates to fall. When will that obvious necessity

ensure his choice after the Border Patrol twice

returned him to his ship without having reli-

ably determined his circumstances and views.

Soviet system, no relief is available for Soviet

citizens other than by Kremlin calculation.

People who have felt that Soviet society would

eventually mature in this direction have been

repeatedly disappointed. The arbitrariness

that allows Moscow to make a gesture now is

the quality that has allowed it for years to deny

ference in an internal Soviet matter.

The sad fact remains that, in the arbitrary

occur? Don't hold your breath. Another way would be for Japan to increase internal demand, diverting purchasing power from foreign securities. That is the nominal goal of Prime Minister Nakasone, who has announced yet another plan to stimulate investment in public works, housing and auto purchases. But the impact is likely to be very modest, merely a new gesture to American

critics like his earlier plea to buy American. It is easy to understand why Americans are unwilling to tighten their belts, but what explains Japan's reluctance to spend more and live better? The only effective short-term way to stimulate demand is to cut taxes or raise public spending, increasing the budget deficit to politically unacceptable levels. Another reason may be the difficulty of managing any rapid change in a culture that operates on consensus. A more important reason is probably the perception among Japanese that they are being asked to bear the responsibility for other countries' weaknesses. They do not work too hard; others work too little. They are not excessively thrifty; others are profligate. The polite face of diplomatic Japan masks a grow-

resentment of foreign criticism. The Japanese have a case. But in an interdependent world economy, neither country can afford the luxury of a debate over who holds the high moral ground. If both do not do a much better job of coordinating domestic

policies, both will be the losers. - THE NEW YORK TIMES.

### One way to impede this return flow of dol-Other Opinion

### The Kremlin Postpones Utopia

Utopia is postponed. That is official. The Soviet Communist Party says as much in its draft party program, which admits that the road to true communism is rockier than it earlier thought, and that capitalism is not the pushover it once hoped. In sum, the new program shows the eastern superpower's ruling elite to be more realistic, and possibly there-

fore easier for the rest of the world to handle. The 1980s so far have seen little Soviet expansionism. One factor in this is the Soviet party's view that capitalism, by which it means the West, is "still strong and dangerous" and, though historically doomed (of course), has bought time for itself "by constantly maneuvering to adjust to the changing situation." This may be a backhanded admission that the West has, for all its problems of unemployment and inflation, launched its economy into a new industrial era in which the Soviet Union is finding it hard to compete.

- The Financial Times (London).

### Top Priority to a Stronger Yen

We repeat our requests that the U.S. govern-ment and Congress continue their efforts to reduce the fiscal deficit, which prompted the strong dollar, and that the Japanese government give top priority to realizing a stronger yen through fiscal and monetary policies. There is no room for optimism for Japan. which must further step up efforts to expand its market, in addition to a stronger-yen policy.

Prime Minister Nakasone [has] said that free trade is bound to give some pain to domestic industries in many countries. To protect free trade, Japan must bear its share of pain.

- The Mainichi Daily News (Tokyo).

#### Aged 50 and Worth Reviving

Happy birthday to the Volkswagen beetle, 50 years old this month. Shrewd marketing and engineering made the ugly little bug the most popular car ever produced. It was cheap to buy and service, fun to drive and easy on gas. In the America of the 1950s it became the thinking person's are a demonstration of independence from size, tail fins and horsepower. In the '60s it was everyone's sensible car. Volkswagen has manufactured more than 20 million bugs; indeed, they are still rolling off

assembly lines in Mexico and Brazil. The basic beetle disappeared from American showrooms in 1975 because, Volkswagen says, it was no longer cheap and the little aircooled engine in the rear was not adaptable to emission controls. As a product of the 1930s the beetle also faced growing competition from Japanese cars designed for the 1970s. Sales in Western Europe are just now coming to an end. but Volkswagen plans to continue

production for Third World consumers. We suspect that a lot of wistful demand remains in at least one industrial country. To recapture America, let VW address the emissions problem and reissue the bug, painted Coca-Cola red, and call it the Classic

### The Soviets **Can Hardly** 'Start Over'

By George F. Will

WASHINGTON — It is paradoxical but true. The task of conservatives is to pull a conservative president, and U.S. diplomacy generally, out of the 19th century and into the 20th. This conclusion is compelled by President Reagan's peculiar and opaque rhetoric about a "fresh

start" in U.S.-Soviet relations, This conclusion is paradoxical because conservatives have a retrospective cast of mind. Their cardinal virtue, prudence, involves mining the past for instructive precedents and proven institutions and procedures. Furthermore, the greatest figures of 19th century diplomacy - Metternich, Wellington, Bismarck, Disraeli

-are in the conservatives' pantheon. Nevertheless, the conservatives' problem today is that President Reagan, although a definer of contemporary conservatism, subscribes to a model of diplomacy that reflects the 18th century liberal mind. This is so even though the model was adopted by those 19th century conservatives. The problem is the radical newness

of a kind of 20th century regime, and the depressing oldness of rhetoric about a "fresh start." What did President Reagan mean by that? Indeed, what could be mean?

He is painfully fond of the leastconservative sentiment conceivable, a statement taken from an anti-conser-vative. Thomas Paine: "We have it in our power to begin the world over again." Any time, any place, that is nonsense. But that may have been how things looked in 18th century America, on the thinly populated

WASHINGTON — President Reagan's address to the Unit-

ed Nations General Assembly was a

political document, calculated to get

the United States off the arms control

defensive and onto a "broader" agen-da for the Geneva summit. But to see

it as a summit game plan is to suggest

that it is not also authentic Reagan

policy. There is the pity. As a tactical

stroke the speech made a certain sense. As policy for the real world, it

The more you examine the speech.

the more apparent it is that this was

vintage Reagan policy. What was heard in the General Assembly was a

Reagan doctrine for foreign policy.

That is not the kindest thing to say when you consider the shelf life of

presidential doctrines: Truman's, Ei-

senhower's, Nixon's, Carter's, But I

am only picking up on what has been said by such as Jeane Kirkpatrick and the crowd at The Heritage Founda-

fringe of an unexplored continent, world "over again" concerning do- ly," rationally calculating how to enor in revolutionary France, in the first flush of upheaval.

Many people then believed in "fresh starts," either because society was not yet planted thick with institutions or because old institutions suddenly seemed fragile. They be-lieved that people everywhere were similar, essentially good and easily educable. "The present age," said Paine, "will hereafter merit to be called the Age of Reason, and the present generation will appear to the future as the Adam of a new world."

Some also believed, with Paine, that the "science of government" is "of all things the least mysterious and the most easy to be understood," for "men have but to think and they will neither act wrong nor be misled. Mr. Reagan has repeatedly used Paine's words about beginning the and all regimes, think "economical-

mestic policy. One result of his sin- hance essentially similar interests. cere belief in "fresh starts" is the budget deficit. The theory was that America would cut taxes and then compensate for the lost revenues by cutting spending. It would start "over again," making a "fresh start" in de-fining federal social roles, as if the New Deal and the Great Society had never happened. But it is, it seems, impossible to start over again at even, say. 1965 levels of social spending. It is not even possible to make a "fresh

Applied to domestic policy, the idea of a "fresh start" has produced fiscal problems. Applied to foreign policy, it can produce disaster.

Americans believe in "fresh starts," meaning limitless possibility, because they think that all people,

prejudices fomented by the intrigues and artifices of courts will cease. The 19th century was not that sestart" without Amtrak. rene, but it was relatively tranquil.

Irving Kristol, writing in "The National Interest," a new foreign policy quarterly of conservative bent, says that 19th century diplomats represented regimes that regarded one another as permanent presences. They defined national interests in limited and familiar ways that allowed conflicts to be resolved by splitting differences. Sometimes the splitting was This 'Reagan Doctrine' Is Only Words done after wars, but they were limited wars. Governments maneuvered to alter, but not obliterate, the "equilib-rium" among powers. The rules of that game of nations allowed for with — "only enough to die with." Yet successful U.S. support for anti-

time-outs, and for fresh starts. #### P ARIS — Almost all players in the endless Middle Face Pendless Middle East drama are in motion again. Whether their myriad signals mean that at last there is a real chance for peace negotiations or whether it is just another turn of the merry-go-round remains to be seen. The Israeli prime minister, Shimon

**Deadlines** 

Heighten

A Drama

By Flora Lewis

Peres, talks repeatedly of getting started before the end of this year, for good reason. He has only until next October in office before he must step down in favor of Likud's Yitzhak Shamir, under the agreement that created the coalition government Engagement in talks serious enough to convince the Israeli public that there is a fair prospect of peace is probably the sole ground on which he could successfully break the deal. Ironically, the "rotation" accord, which looked like a grave weakness

when it was made a year ago, has strengthened Mr. Peres's hand con-siderably. It is a powerful deadline for Jordan, because Mr. Shamir and his party have made no secret of their desire to annex occupied lands and refuse any territorial concessions.

There is a double deadline, afthough the second one is less precise. It is the growing weakness of President Hosni Mubarak in the face of domestic unrest. Israel has no doubts. about his loyalty to their peace treaty, but if he should fall before the treaty is broadened to Jordan, a new leader in Cairo might not hold firm.

The two deadlines are pressing in various ways on all who are involved. King Hussein still seems to hope that Yasser Arafat will finally carry out the conditions that Mr. Arafat accepted last spring so that Jordan can negotiate on behalf of the PLO.

To Syria's evident satisfaction, Mr. Arafat has weakened himself so badly that his choice may be only to support King Hussein or fade into impotence on the sidelines. His base in Tunis is shaky, and if he has to move once again; to Iraq, his com-mandos will still be practically out of striking distance from Israel.

Syria, as usual, is a crucial enigma. But its newly warming relations with Jordan are not worrying Mr. Peres. President Hafez al-Assad may be coming to prefer playing a role in an international peace process, without Mr. Aralat, to trying to break it up and risk being left out.

Shifts in Soviet policy are of spe-cial importance. Mikhail Gorbachev has said he will not decide before his summit meeting with President Reagan. But he is sending messages that he is prepared to move dramatically on Jewish emigration and limited relations with Israel if the U.S.-Soviet climate is favorable. The French offer to airlift Jewish emigrants directly based on private exchanges that make that a real possibility.

The Russians have told Western diplomats that they made a mistake insisting in the past that the people they let out must go somewhere other than Israel first, because then large numbers went to America instead That undermined the claim that the movement was only reuniting families, not a special exit privilege for Jews that is denied to other citizens.

Israeli law, arriving Jews immediately and automatically receive Israeli citizenship. Under American law they would then have to apply for American visas in the Israeli quota rather than under the far more generous provisions for admitting refugees.

It is not at all clear what Mr. Gor-Large-scale emigration would be a brilliant success for the president's human rights program. That should be an additional incentive to make

the summit conference work well. pate in an international conference that would provide an umbrella for Israeli-Jordanian negotiations shows that Moscow now takes the possibility of talks seriously and is determined not to be left out. Recently, a high-level Soviet diplomat repeated to a senior Israeli ambassador that inthe current Moscow judgment it was a mistake to break relations with Is-

Mr. Reagan's surprising omission of the Middle East from the list of regional trouble spots in his United Nations speech is a sign that diplomacy on this issue may be too promising to disturb with futile rhetoric.

But, but, but. There are bound to be attempts to blow a the light of the street of the street

long time to line up another chance.

### LETTERS TO THE EDITOR

The reams you gave us about the Achille Lauro and Leon Klinghoffer

contrast sharply with your brief in-side-page treatment of the brutal bombing death in Los Angeles of an official of the Arab-American Anti-

Discrimination League, Alex Odeh ("Bomb Kills Arab-American Activ-

ist," Oct. 12). Are you trying to tell us that Mr. Klinghoffer's brutal slaying

was front-page news because it came at the hands of Palestinian terrorists,

while the Los Angeles killing, obvi-ously the work of pro-Israeli terror-

ists, was of secondary importance be-

cause it involved an Arab? Are there

seized upon as a Reagan doctrine.

lies not in measures of military de-

fense or the control of weapons, but

in the expansion of individual free-

dom and human rights." And if that is the agenda for the Geneva summit,

you also have to wonder whether its

epitaph will be any cheerier than

John Kennedy's for the Vienna sum-

mit in 1961. "It's going to be a cold winter," he told Nikita Khrushchev.

Washington Post Writers Group.

It is hard to follow William Pfaff's logic in "Behind Peres's Offer, a Note of Desperation" (Oct. 26). Israel has made proposals. "Why should Jordan cooperate?" asks Mr. Pfaff. Why should it not? Israel has offered to negotiate within the context of an international forum and to do so with Palestinians. The aim of the talks is to terminate the state of war and define permanent boundaries. Nothing has been determined in advance, so why not talk? Israel withdrew totally from the Sinai in exchange for a peace treaty. The West Bank is a more complex affair, but until the parties begin talking, nothing will be solved.

BARRY SHENKER

Shimon Peres may be desperate, as Mr. Plaff would have it, but at least he is doing something and not merely retrenching behind hate-filled memories. He is a new-thinking, fresh type of politician. Mr. Pfaff -and the rest. of us - might give him a chance.

Edmond Halley didn't discover his comet.

### IN BRIEF

Defensins' May Help Fight Disease

LOS ANGELES (NYT) — Scientists have discovered natural substances in human white blood cells that attack a wide range of germs, according to reports in the Journal of Clinical Investigation: The substance at the first blood cells that attack a wide range of germs, according to reports in the Journal of Clinical Investigation: The substance at the first blood cells that attack a wide range of germs, according to report of the substance of the s stances attack staphylococci and E. coli bacteria as well as some diseasecausing fungi and viruses. The scientists at University of California at Los

Angeles have named the substances "defensins." They said that further analysis may make it possible to design artificial defensins superior to those that exist naturally and that their discovery may improve understanding of the body's means of resisting infections.

The knowledge will eventually lead to improved treatment, they said.

The substances were found in the most common type of defensive white blood cells, neutrophils. Such cells are attracted to sites of infection, where they destroy invading microbes. The defensins are thought to be important in the process of destruction. The scientists found six varieties in rabbits' cells, and later identified three others in human

#### Soviet poky men name. Mikhai Ger Wind Shifts Simulated in Laboratory ... . will not decide her-ं करणाह आ**ते रिकां**स

CAMBRIDGE England (NYT) — Researchers at Cambridge University in England have developed a laboratory simulation of the sudden wind shifts known as microbursts that often plague aircraft in landings

A microburst, with gusts up to 80 miles an hour (130 kph), was implicated in the fatal crash of a jet airliner at the Dallas-Fort Worth airport in August. The winds are produced when cold air at high altitudes sinks to the ground, where it is diverted horizontally and results in

dangerous flows of short-lived, high-speed winds. Better understanding of how such winds develop may help prevent future disasters.

Dr. P. F.-Linden and Dr. J. E. Simpson of the department of applied mathematics and theoretical physics developed a model of this event, described in Nature magazine, by mixing waters of different densities. A dense fluid, saline water, was poured into a less dense liquid, producing a complex horizontal vortex at the leading edge of the saline outflow. The scientists observed an increase in circulation of the vortex as it moved away from the source. They say this strong circulation is likely to be one of the main hazards of microbursts.

#### const cont pure ... crued to other cr Pollution Could Heat Climate by 2030 . . . o. 12 le rander arraine less none

GENEVA (UPI) — Temperatures could rise as much as 4.5 degrees Centigrade (8 degrees Fahrenheit) as early as the 2030s because of atmospheric pollution, a United Nations scientific conference warned. Such an increase "could have profound effects on global ecosystems,

have to apply lot agriculture, water resources and sea ice," a conference statement said. Unless atmospheric pollution is reduced, it said, the first half of the next century will see "a rise of global mean temperature greater than any in man's history." In the past 100 years, the global mean temperature increased an estimated 0.3 to 0.7 degrees Centigrade, the statement said. The conference called for action by governments to reduce coal and oil

carbon dioxide emissions as well as other pollutants known as greenhouse

> predicted. And still faithful to his peared in 1910 is back again this make its closest inbound approach to Earth on Nov. 27, passing within 58 million miles. By the end of the year the comet should be visible with ordinary binoculars and small telescopes. Then next March, after the first time by an international

armada of spacecraft.

POSTERITY has been less than generous to Halley in ignoring his other contributions to science. He was an innovative cartographer. student of geomagnetism, inventor of a deep-sea diving bell, author of the first actuarial mortality tables and captain of a bold seagoing sci-entific expedition. As a mathematician and astronomer, his primary calling. Halley was a pivotal figure in the scientific revolution set in motion by Copernicus a century earlier and advanced by the increasing use of telescopes in observing the workings of the uni-

But Halley was eclipsed in history, because one of his contemporaries was Isaac Newton. The two men were a study in contrasts, as Philip Morrison, a physicist at the Massa-chusetts Institute of Technology, writes in the November issue of Scientific American: "Halley the man orbits forever in the shadow of the unmatched Newton, but he was a gifted, original, versatile and productive scientist, and a human being as adventuresome, generous, loving and sweet as Newton was retiring, cold, solitary and austere."

Yet they became colleagues. It was Halley who encouraged the retiring Newton to write down the principles of gravitation he had doveloped after years of thought sup-posedly inspired by the legendary falling apple. Newton recognized that gravity on Earth represented the same law of force as that affecting the motion of planets around the Sun. Halley edited the manuscript and arranged financing for publication in 1687 of Newton's reat book, "The Mathematical Principles of Natural Philosophy."

Halley's encouragement of Newton was perhaps his greatest contribution to science, according to Alan Cook, a professor of natural ty in England. But in applying Newton's laws of gravitation in making his comet prediction, Halley went an important step further. His correct prediction turned out to be the first direct confirmation of Newton's theories.

calculations, the comet that last ap-notion of an Earth-centered unipeared in 1910 is back again this verse as nothing but a human con-vear, now about 100 million miles ceit. The Sun did not move around (160 kilometers) away and travel- a fixed Earth; the Earth moved ing 66,000 miles an hour. It will around the Sun, Johannes Kepler, the German who inherited the meticulous observations of Tycho Brahe, the Danish astronomer, determined that the orbit of a planet was not circular, as had been assumed, but was an ellipse with the the comet has swung around the Sun at one focus. Meanwhile, Gali-Sun, it will be observed up close for leo Galilei in 1609 had peered through the first telescope at Jupiter and seen for the first time the four large satellites orbiting the gi-ant planet. This microcosm of the planetary system confirmed Copernican theory.

Still, astronomers hardly knew what to make of comets. Tycho Brahe had determined that they were not, as Aristotle had declared atmospheric phenomena. But Kep-ler did not believe they obeyed his own laws of planetary motion. in a straight line. They might fall into the Sun and be destroyed. Or, missing the Sun, they might swing around it and return to outer space. They would not, it was supposed,

Stung by the failure with the 1680 comet, Halley made even more careful observations of the telescope in November 1682. This was the object that would someday be known as Halley's comet.

I HE comet set him to thinking about the problem that was very much on the minds of many scientists of the day. Kepler had de-scribed the elliptical orbits of planets, but did not know why this was so. What was the force accounting for the motions of the planets and other bodies like comets?

In 1684, Halley met with Robert Hooke, a physicist, and Christopher Wren, the architect, at a London coffeehouse, and fell into a long discussion of the problem that prompted him to pay a visit to Newton in Cambridge. Newton told his visitor that he had solved the problem some years earlier and then laid aside the calculations. This was the genesis of Newton's universal laws of gravitation and of Halley's collaboration in having

Harr reaction in Europe, fe riss, senior project director of NASA's Global Tropospheric Ex-

Total Serie The laser provides information on the exact altitudes and dimensions of dust clouds from Africa, giving scientists better access to floating treasure troves of solid particles and inert gases.

While there have been several studies of the atmosphere in urban areas, Mr. Harriss said the NASA project is one of the first designed to examine remote regions free from man-made pollutants, where scientists can observe the mechanics of atmospheric conditions and establish a point of reference to assess man's impact elsewhere.

some preliminary observations gleaned from an expedition in July to the central Amazon River basin. There, scientists from the United States and Brazil took samples from the lower part of the troposphere, the first 6 to 7 miles (9 to 11 kilometers) of atmosphere, to gauge the effects of deforestation in

agency, the Instituto Nacional de Pesquisas Espaciais, undertook the first large-scale measurement of gases produced by a forest, in an effort to learn whether such gases may be key elements in the earth's overall atmospheric chemistry, and if so, to determine their origin.

"By putting our data through theoretical models," Mr. Harriss said, "we'll be able to predict what effects deforestation would have on the climate and air quality were it to continue at various levels."

From the Brazilian experiments and others, more is being learned about how natural sources of such gases as carbon dioxide, carbon monoxide and mitrous oxide interact with man-made pollutants. The project is also monitoring a possi-ble decline in the atmospheric concentration of hydroxyls, small scav-

NEW YORK - Shares on the New York Stock Exchange rallied Wednesday to a record high closing in active trading. Analysts said the gains were spurred by ex-

pectations of lower interest rates. The Dow Jones industrial average added 6.84 to 1,375.57, surpassing its previous record of 1,369.29, set Oct. 17.

Broader market indicators advanced. The New York Stock Exchange index rose 0.50 to 109.69. Standard & Poor's 500-stock index climbed 0.84 to 190.07. The price of an average

Advancing stocks outpaced declining ones by a 5-3 ratio. Volume totaled 120.4 million shares, up from 110.6 million Tuesday.

When interest rates fall, it lowers business's cost of borrowing money. "Investors are perceiving that a more accommodative interest rate environment is ahead," said Eugene Peroni Jr., chief technical analyst at

Bateman Eichler Hill Richards. Mr. Peroni said a leadership shift from "rumor stocks" to interest rate-sensitive utility and financial issues gave the market a stronger underlying tone.

Money made in recent takeover situations is eing recycled back into the market and will help propel the Dow into the 1,400 area, Mr. Peroni said.

But he said the key to the market's ability to move higher will be how much fresh cash equi-

ties can attract. The direction of interest rates will determine that, he said. Remarks Monday by the Federal Reserve Board chairman, Paul A. Volcker, and those Wednesday by the Fed vice chairman, Preston

### WALL STREET WATCH

THURSDAY, OCTOBER 31, 1985

### Money Manager Sees Hope In 'Value-Dislocations'

By EDWARD ROHRBACH

International Herald Tribung EW YORK — If the stock market was a new Broadway play it would close after one performance to a thunderous yawn. There's just no pizazz on Wall Street, despite rave reviews recently from the Dow Jones average, and unfortunately for investors they cannot demand their money back.

But backstage of all the boredom, is there something worse

"There are great

money ... greater

than ever before."

opportunities to make

"Most people on Wall street are deathly afraid," said John M. LeFrere, managing partner of Delta Capital Management in New York. "They're beaten up and bearish and they don't understand why the traditional methods of investing have

failed them."
He noted that for three straight years more than 70

Monte-Carlo

Country of cating provides nation

S Range and

The Branch of th

percent of equity managers
have underperformed the Standard & Poor's 500 stock index.
While professional fund managers generally got comfortably
ahead of the game in the first half of 1985, Mr. LeFrere called the third quarter a "disaster" for them, with another year of under-performance threatening unless stocks move broadly to new highs in the fourth quarter.

With passive techniques such as index funds growing in popularity that promise no more — or no less — than what the overall market does, he said that investment managers are "taking more risks and the strategy is backfiring on them."

Forecasting earnings of companies has been the conventional method for analysts to separate Wall Street's winners from losers, but Mr. LeFrere asserted: "If there's one lesson I've learned its

not to believe in earnings projections."

He sighted the example of IBM. Last May the company was assuring the investment community and apparently itself that the 1985 profit picture was bright. But in the second quarter, it

reported a loss and said that it feared more problems ahead.

"Everybody seems to agree that IBM is the best managed company in America," Mr. LeFrere said. "If they can't predict what's ahead for the bottom line, how can it be expected of the others? Even the big retailers like Sears and J.C. Penney apparently can't predict anymore what kind of a Christmas they're

E SAID he believes that this inability to provide investors with confidence about future earnings and dividends of companies is largely responsible for the new focus on picking merger candidates as a way to make money in stocks. However, this does not mean that all investors are condemned to a short run on Wall Street. "There are great opportunities to make money — greater than ever before," he asserted.

Mr. LeFrere's fund has been up 30 percent a year in the 1980s. Essential to that kind of successful investing, he said, is understanding that "the stock market now is totally institutionalized," with computer-driven buy-and-sell programs dictating more and

more the market's movements.

He estimates that now only half the volume on the New York Stock Exchange is "real investment," with the balance represent-ing the so-called passive trades involving futures and other instruments in which the largest 200 to 300 companies are often traded in "baskets" by the large investment houses.

Computerized investment techniques will eventually dominate

ou percent of Wall Street, he predicted.

While this may appear to squeeze out anyone but the big institutions, Mr. LeFrere sees it creating an increasing number of "value dislocations" that agile traders can seize on. What's more, he said, this one-way volatility when computers command which way have fruit more more more traders. 80 percent of Wall Street, he predicted. way huge funds will move means smaller investors can make

money by anticipating surges.

### U.S. Steel To Buy Texas Oil

## **Transaction Put**

At \$3.6 Billion The Associated Press

PITTSBURGH — United States Steel Corp. said Wednesday that it has signed an agreement to acquire Texas Oil & Gas Corp., one of the largest U.S. independent natural gas companies, in an exchange of stock valued at nearly \$3.6 billion. Shareholders of Texas Oil & Gas would receive 0.6333 share of U.S.

Steel stock for each of their com-mon shares, U.S. Steel said. No price was disclosed. But based on a closing price Wednes-day of \$26.75 a share for U.S. Steel and approximately 210 million shares of Texas Oil & Gas stock outstanding the transaction would be worth \$3.55 billion, or about \$16.32 a share. That is well below

sto.32 a share. That is well below earlier estimates by analysts that put a price tag of Texas Oil & Gas at about \$5.2 billion.

However, U.S. Steel was granted several options by Texas Oil & Gas that would protect U.S. Steel and make competing bids less attrac-

U.S. Steel was given an option to purchase up to 38.9 million shares of unissued Texas Oil & Gas stock at \$17.42 a share, which would ensure a profit if Texas Oil & Gas were acquired by another suitor at the \$24 to \$25 a share that some

analysts have predicted.

The U.S. steelmaker also will be able to buy for \$1.3 billion all the capital stock of three companies that represent substantially all of Texas Oil & Gas Corp.'s natural-gas pipeline business. Such a "lockoption would enable U.S. Steel acquire Delhi Gas Pipeline Corp., Tonkawa Gas Processing Co. and Nences Co.

U.S. Steel said that if succeeds, Texas Oil & Gas would remain a separate business based in Dallas, just as Marathon Oil Co. remained largely independent when the steelmaker purchased that company for \$6.5 billion in 1981.

U.S. Steel already holds 14.5 million shares, or 6.9 percent, of Texas Oil & Gas through the steelmaker's pension trustee, U.S. Steel and Carnegie Pension Fund.
The combination would create unfair trade practices, would cause ernment was alleged by Boeing to consternation among European of have offered the Indian governficials who view Airbus as one of ment in return for the Airbus order.

one of the largest companies in the United States, with total assets of about \$23 billion and annual revenues of approximately \$21 billion. Earlier, U.S. Steel reported third-quarter net profit of \$100 million, or 62 cents a common share, down 35 percent from \$153 panies, million, or \$1.15 a share, in the owned. vear-earlier period.

### France Seeks to Export Fast Trains

### **But Competition** For U.S. Projects Is Heating Up

By Paul Lewis

New York Times Service
PARIS — The vineyards of Burgundy flash past the window in a long green blur as France's high-speed Train à Grande Vi-tesse, traveling at 170 miles an hour, eats up the 270 miles between Paris and Lyon in a bare two hours.

If the builders and operators of the world's fastest and most extensive high-speed rail network have their way, the bulletshaped trains will also be streaking past some very different scenes in years to come: the countryside of New York, Florida and other U.S. states.

In competition with train makers from Japan, Germany, Britain and Canada, French rail companies are now pushing hard to sell the TGV to state and local authorities in the United States.

"No one can rival our experience," insists Michel Walrave, director of planning and re-search at the Societé Nationale des Chemins de Fer, France's government owned railway. The SNCF designed and operates the Train à Grande Vitesse, which means the train of great speed.

"We have the best technology, so we are confident any state interested in high-speed rail travel will recognize the TGV's val-ue," added Cullen Dwyer, a spokesman for TGV Co. The

## **EC Ministers** Agree to Reduce **Steel Subsidies**

LUXEMBOURG — European Community industry ministers ment with the United States by agreed Wednesday to reduce subsidies next year for the group's fragile steel industry, removing a threat of instability hanging over the battered community market.

After more than 12 hours of alks, they produced an accord settling the pattern of controls and nature of subsidies to remain in force after existing crists controls expire Dec. 31.

The EC's industry commission-

er, Karl-Heinz Nurjes, had warned that failure to reach agreement this month could have sent steel prices tumbling because uncertainty over future trading rules would cause buyers to delay placing orders.

The agreement removes quotas from about 15 percent of the EC's 70 million metric tens of production and bans government subsidies for company operating and

investment costs. Luxembourg's economic affairs minister, Jacques Poos, said that after Jan. 1, government subsidies can be paid to steel companies only for restricted purposes: research. environmental protection and

company closures. [Greece, poorest of the 10 EC nations, was exempted from the subsidy prohibition. Agence France-Presse said. The new regu-lations do not apply to Spain and Portugal, which are due to enter the EC in January.]

Diplomats said that the pact could strengthen the EC's hand in steel trade disputes with the United States by weakening Washington's argument that heavy subsidies give the community an unfair competi-tive edge in world markets. Billions of dollars have been

poured into the EC steel industry over the past five years as emergen-cy aid to help cushion it while it scrapped 32 million metric tons of excess annual capacity and cut its work force by a quarter.

Ailing companies were further sheltered by a system of maximum production quotas designed to pre-vent a glut of steel forcing down prices in a recession-hit market.

Ministers also agreed to lift production quotas on Jan. 1 on two categories of steel - reinforced bars and coated sheet - which sources said. Airbus is a consortional trade agreements that seek to tion officials suggested that Airbus account for about 9 million metric tons of annual output.

An official close to Clayton K. The U.S. trade representative, (Continued on Page 11, Col. 1) Clayton Yeutter, has warned that

### unless it reaches a new steel agree-Thursday, Reuters reported from Washington.

Mr. Yeutter did not specify Tuesday what kind of action might be taken, but other U.S. officials have said that Washington is prepared to impose countervailing duties on many European steel imports. The existing agreements expire Dec. 31, but the United States and the EC agreed previously to reach new terms by Oct. 31.

[Willy de Clercq, the EC's commissioner for external relations, said Tuesday that talks were progressing and that "there is some possibility of an agreement" by Thursday, The Associated Press reported from Luxembourg.

[The United States wants an accord that runs from January 1986 through September 1989. The EC want a shorter, narrower accord that does not limit semi-finished

#### Tin Officials Fail to Achieve Rescue Package

Reuter.

LONDON — The International Tin Council ended a two day emergency meeting in London without agreeing on a rescue package that would enable its buffer-stock operation to resume price-support efforts, ITC officials said Wednesday.

The meeting also failed to respond to an appeal by the Lon-don Metal Exchange to the ITC and its members to honor its trading commitments. The council is expected to meet again on Nov. 12 unless circumstances require reconvening earlier, the officials said.

Tin trading on the LME will remain suspended for the rest of the week, the chief executive of the exchange, Michael Brown, said.

Trading was originally sus-pended last Thursday when the TC buffer stock ran out of money to support tin prices. But the buffer-stock manager, Pieter de Koning, said Wednesday that he was optimistic that extra funds would be made

The LME is seeking assurances from the council and its members that will ensure the survival of the exchange. Trading has also been suspended in Kuala Lumpur.

Sing, S. 2.78 "The yen should strengthen further [against the dollar] in order to rectify [Japan's] cur-rent account surplus," Mr. Oba

The dollar has fallen 12.5 percent from its level before the finance ministers from the Group of Five industrialized nations met in New York on Sept. 22 and agreed to cooperate to lead the dollar lower.

TOKYO -- Japan's current ac- pan's deputy finance minister, To- 1984 surplus was \$2.04 billion. in the first half of the fiscal year count surplus widened to \$4.88 bil- momitsu Oba, said he wanted to lion in September from a \$3.49- see the yen even stronger. Over the

billion surplus in August, the past week the yen has risen from Finance Ministry said Wednesday. around 216 to the dollar. The September figure compared with a \$4.18-billion surplus a year pan's long-term capital account serves. deficit narrowed sharply to \$3.11 The surplus on merchandise billion in September from a \$6.53billion deficit in August. That com-pared with a \$2.14-billion deficit in

trade expanded to \$5.27 billion in September from \$4.38 billion a month earlier, and compared with a \$5.1-billion surplus in September 1984, the ministry said. The current account, the broad-

est measure of trade performance, covers trade in merchandise, banking services, shipping fees and other nonmerchandise items. The governments of the United

States, West Germany, France, Britain and Japan have been acting jointly since Sept. 22 to depress the level of the dollar, particularly in relation to the yen, as protectionist sentiment builds in the U.S. Congress because of the U.S. trade deficit with Japan.

yen reduced Japanese exports.

The dollar closed at 211.75 yer

But analysts in Tokyo expected a lag before a falling dollar and rising

September 1984. The balance of payments swung to \$9,34 billion from \$9,33 billion chases of foreign bonds and the to surplus of \$1.78 billion in Sepand \$9,25 billion in September dollar's fall against the yen, bank tember from a deficit of \$3.08 bil- 1984.

in Tokyo on Wednesday, and Ja- lion in August. The September The merchandise-trade surplus

"We are moving very fast," said Alain Gomez, chairman of Thornson. He said he expected final agreement could be reached within two to three weeks

Asked why Thomson was interested in Mostek at a time when the the sale ground appears with the sale ground appears with break the U.S. semiconductor market was depressed and faced overcapacity, Mr. Gomez said he agreed with industry estimates that the market would recover at the end of 1986 and would generate what he termed "strong demand" throughout 1987. Thomson, France's largest elec-

#### Du Pont Net Off Conflored to be 10.5% in Period

United Press International WILMINGTON, Delaware - Du Pont Co. reported on Wednesday third-quarter net profit of \$282 million, down 10.5 percent from \$315 million profit in the quarter last year. The company said earnings per share were \$1.17, compared with \$1.31 in the 1984 period. Third-quarter sales were \$8.65 billion, down from \$8.8 billion.

Third-quarter earnings were reduced by \$88 million after taxes by charges arising from the closure of an ethylene production unit in Alvin, Texas, and from Du Pont's withdrawal from an investment in Syngas

Dy Axel Krause tronics company, which this year superist to make about 80 percent expects to make 80 percent expects reached an advanced stage between crn Europe, had planned to acquire United Technologies Corp. and a manufacturing site and sales government-owned Thomson SA force in the United States in 1986-1987. Mr. Gomez said in an intertion of Mostek Corp., United's ail. view. Thomson's U.S. semiconducing semiconductor subsidiary, ex- tor sales currently total between \$30 million and \$35 million annu-

didn't seel the business discipline was that tight compared with some other companies we know. In 1985, up against IBM, you can't afford to

The analyst at the Swedish bank said he regarded Ericsson Information Systems' development of the Ericsson 2500 minicomputer as one of the most serious potential prob-

"Minicomputers have high development costs, especially for software development, and the Ericsson mini has its own unique operating system, which means they have to write their own software," the analyst said. Operating systems are a set of built-in instructions that tell a computer's miniprocessors how to handle all other instructions, such as word processing or administrative programs.

"I think they are missing the train here with minicomputers," the analyst cautioned, "and the question is, how long they will keep trying." The Ericsson group's patience could run out, he suggested, if profitability from Public Telecommunications declined for some reason. "They made 92 percent of Ericsson's profits on just over 30 percent of sales" in 1984, the ana-

rather recent examination, we 1986. But he stressed that there would be new-product introductions in all EIS product areas during the year.

Sloppy product launches went undetected, Mr. Larsson said, because Eriesson Information Systems was, at the same time, trying to administratively assimilate recent acquisitions that were developers of some of the products. Formed in 1981 as a subsidiary division, EIS acquired Datasaab, a maker of minicomputers and banking systems, in 1982. In 1983, it acquired Pacit, a maker of office

Mr. Larsson declined to discuss specific new products, but hinted broadly that the MD-110 would be offered with enhanced data communications capability, making it a true data-voice-text exchange. Users of current model MD-110s need a modem to send data, but sources close to Ericsson Information said the new version would have software allowing the PBX to link directly with computers and transmit data at high speeds of up to 64,000 bit per second.

Other products to be introduced soon, it has been said, will be a new printer, though not a laser printer, and possibly some user-friendly, integrated software for the Ericsson PC. In the medium term, a laser Mr. Larsson said new products printer under the Ericsson trade-would be launched at slower rate in mark was possible, a source said.

Practices in

Airbus Sales

Yeutter, the U.S. trade represe

tive, confirmed that the prospect of

taking action against Airbus for possible unfair trade practices — including indirect government subsidization on the production end and the offering of special induce-

ments to customers — had been raised at a full cabinet meeting in

Although the cabinet had decid-

ed at the time not to proceed with a Section 301 suit against Airbus, U.S. officials said, the issue has not

been scratched from the agenda of

some four to five new cases being considered for Section 301 action.

which anthorizes the president to retaliate if consultations fail.

case against Airbus was not ripe."

an official in the Office of the Spe-

cial Trade Representative, or OSTR, said. "Obviously, that deci-

sion did not imply a definite no.

The cabinet wants to be sure there

is sufficient concrete evidence to merit a reconsideration of the Air-bus case, which now is being more thoroughly examined at the sub-

cabinet level."
A round of interviews with officials at OSTR and the departments of Commerce and State suggested that officials there were

taking a cautious line on Airbus, with State Department officials —

concerned about potential diplomatic repercussions — leaning most heavily toward finding solutions that would a void a Section 301 action. Officials in the trade

Prepresentative's office appear no

less sensitive to those diplomatic concerns, yet note that President Ronald Reagan has come out with a new "get tough" attitude on combating unfair trade in which Mr. Yentter's office is the cutting edge.

"We have to handle the Airbus case very carefully," the OSTR official added. "We're aware of the political sensitivity of the Europe-

ans on this one and also of the sensitivities of U.S. suppliers to

Airbus aircraft."
An estimated 30 percent of the

value of Airbus planes stems from

parts - chiefly engines - supplied

by U.S. companies, including United Technology Corp.'s Pratt & Whitney, as well as General Electric Co. The role of U.S. parts suppliers, U.S. officials said, complications and desired to the control of the control o

cates any decision to proceed with action aimed at protecting U.S. aircraft builders, such as Boeing and

Sanofi expects its net profit per share to rise by 15 percent from 1984 levels of 38.53 French francs (\$4.84), according to Jean-Pierre Leon, the finance director.

Statell A/S, Norway's government-owned oil company, and Veba AG of West Germany are discussing the construction of a plant to produce methyl tertiarybutyl ether, an additive for leadfree gasoline, Statoil said.

#### ADVERTISEMENT FOR GRAIN SILO CONCESSION

The Arab Republic of Egypt

Ministry of DEVELOPMENT "NEW COMMUNITIES ORGANIZATION"

Invites Proposals:

From

Qualified GRAIN SILO Operators. Developers, Investors, and Enterpreneurs of Any Nationality

for the CONCESSION to Build, Operate, Finance and Develop A ONE HALF TO ONE MILLION TON GRAIN SILO IN THE INDUSTRIAL ZONE AT

DAMIETTA PORT

and engage in all related business activities of the international grain trade.

The first stage of the new port of Damietta is expected to be in operation by the end of 1985. The port is strategically located on the Mediterranean coast of Egypt between Alexandria and Port Said. It will be chiefly a transshipment center for the Mediterranean, the Red Sea and the Middle East areas with cargo traffic from 6 to 16 Million Tons annually by the year

In order to insure a steady supply of grain available to Egypt in spite of any shortages in external supply and to take advantage of favourable international market prices from time to time, the Government of Egypt desires to provide for a strategic reserve of about 20% (twenty percent) of annual Egyptian grain import requirements. The storage, equivalent to a two to three month supply of grain, will require a silo capacity of 500,000 to 1,000,000 Tons, based on the importation in 1982-1983 of 4,250,000 Tons.

Accordingly, the Government of Egypt proposes to enter into a concession arrangement with an internationally experienced grain trader and developer or foreign investor to carry out studies, finance, design, build, operate and engage in grain trade based in the industrial zone of the new Port of Damietta.

The Terms of Reference (TOR) providing complete details on proposal requirements may be purchased for LE 135 or U.S. \$ 100 from the Research & Studies Organization of the Ministry of Development, 2nd Floor, 1 Ismail Abeza Street, Garden City, Cairo, where proposals should be submitted.

Technical and sealed financial proposals based on the TOR ONLY will be receive until Thursday 30 January

## At the heart of Germany's financial capital:

### Helaba Frankfurt

Helaba Frankfurt in brief. A solid banking partner.

Helaba Frankfurt is a government-backed universal bank ranking among Germany's foremost financial institutions with total assets exceeding DM 66 billion. It offers a broad range of commercial and investment banking facilities as well as brokerage and investment advisory services.

Helaba Frankfurt serves both domestic and international clients.

Concentrating on wholesale banking, especially in the medium to long-term sector. Helaba Frankfurt tailors its comprehensive services for large corporations, central banks, government entities, and other financial institutions. Moreover, it acts as banker to the State of Hesse.

Funding is facilitated through issuing its own bearer bonds and SD Certificates (Schuldscheindarlehen). The total outstanding is some DM 27 billion.

Helaba Frankfurt is also at home in key international markets, operating for example full service branches in London and New York as well as a Luxembourg subsidiary specializing in Euromarket transactions and private banking.

You'll find Helaba Frankfurt in major financial centers.

## Dollar Gains in U.S. After Falling in Europe

NEW YORK - The dollar gained Wednesday in New York after falling against most major currencies in Enrope.

The rise in the United States followed a statement by the Federal Reserve denying numors that major industrialized countries were coordinating interest-rate policies.

The dollar began to move up after the Fed's vice chairman, Preston Martin, said the Fed will not try to target the dollar, according to Daniel Holland, vice president at Discount Corp. of New York.

"The Fed's denial of reports that the U.S. had agreed not to lower The discount rate also generated some buying," he added.

The dollar had fallen sharply earlier this week and in foreign trading Wednesday when Japan and European countries pushed interest rates higher, leading to speculation the United States had

Five industrialized countries not to raise U.S. many.

Mr. Mantin, speaking in Fairfield, Connecticut, said trying to peg the dollars fearing exchange rate would lead to higher U.S. inflation. He sho said the Fed is "not going to try, so talk the dollar down," but he declined to comment on what he always are ment on what its plans are.

Mr. Holland, said speculators

who had taken short, or sell, positions in the dollar on futures marthe suddennise and that fueled the advance further.

Trading was "very choppy," and nervous, he said.

The British pound ended at \$1,434 in New York, down from \$1.4440 on Tuesday. The U.S. unit

ended in New York at 2.632 Deut-sche marks, up from 2.6105 DM. Other New York rates were: 8.0175 French frames, up from 7.9625 frames; and 2.155 Swiss francs, up from 2.139 francs.

don to \$1.4415 from Tuesday's

In Frankfort, the U.S. currency was fixed in the afternoon at 2.6166 DM, down from Tuesday's 2.6325

There were no reports of sales of the possibility of intervention continued to hang over the market.

Corrency dealers said the market largely ignored a U.S. government report Wednesday that single-famhome sales fell 2.6 percent in September. Attention was focused on balance-of-trade and factoryorders statistics due out Thursday. Dealers said volume was not par-

ticularly high but business was fairly active, particularly on pound-dollar trading early Wednesday. In Zurich, the dollar ended Wednesday at 2.1433 Swiss francs. down from 2.1523 on Tuesday. In Paris, the U.S. currency was 30 percent."
fixed at 7.974 French francs, down

### Dollar Straight, Floating-Rate Sectors Rise

By Christopher Pizzey

THE EUROMARKETS

LONDON - The dollarstraight and floating-rate note sec-tors of the Eurobond market rose sharply in active trading Wednesday and the firm undertone prompted a rush of new borrowers in both sectors, dealers said.

Prices of seasoned dollar straights rose from 4 to a full point as U.S. credit markets extended Tuesday's gains following the successful outcome of the first of the Treasury's "mini-refunding" auc-"That auction's prompted loads of activity here," one trader said. Floating-rate note issues were generally five to 10 basis points

Two British banks launched perpetual floating-rate notes that will rank as primary capital under Bank of England guidelines, and both issues were well received by investors because of their generous mar-

(Continued from Page 9) a small hole," he said. "The trip There were no reports of sales of wire is getting tighter day by day. dollars by central banks, sithough There will be volatility in major

indexes never seen before." Mr. LeFrere said he thinks that wild swings in the Dow average of 50 to 100 points a session will not

With so many billions of investment dollars poised to "flip" between stock and bonds, he said stocks could "explode" up 700 points if general interest rates broke down two percentage points from their current level.

But if rates go up a percentage point or more, he said that "the stock market could collapse 20 to Britain

A larger percentage of trades will involve fewer companies, he pre-dicts, "with a lot of forgotten companies created," notably in the over-the-counter market.

Mr. LeFrere's fund has been particularly successful buying "sec-ond-tier" airline stocks. Eastern Airlines has been a big winner for him in 1985.

"With enormous consolidation" ahead for the industry, he thinks that Eastern, along with Western Airlines, will be bought and eventually only three or four major carriers will be left in the country. "After United and American you have to start guessing about who will be the survivors," he said. "Even Delta and Northwest might be taken over."

#### Wholesale Price Index Falls 0.2% in Japan

Reuters TOKYO — Japan's wholesale price index (ell 0.2 percent to 97.7 in the second 10 days of October from the preceding 10 days, com-pared with an unchanged index in the like September period, the Bank of Japan said Wednesday. The interim October index was down 3.2 percent from a year earli-

er, compared with a 1.8-percent

Japan's Shinkansen "bullet French, who abandoned this idea a and Las Vegas for which studies are trains" are basically similar to the decade ago, say the track would TGV, though they are somewhat cost at least twice as much as a new slower, traveling at a top speed of TGV line, which can be built for about \$4 million a mile.

A Canadian company, Bombardier Inc., has manufactured a highspeed train now operating between Montreal and Ottawa. Although designed to run at 125 miles an hour, the train has been plagued by troubles and is limited to a speed of

about 80 miles an hour. Britain is striving to build a "tilting" train that can sustain speeds of 125 miles an hour on existing track, British Rail, the nationalized railway, is working on a version of the train in which the passenger coaches would "lean" inward on fast curves to keep passengers from being thrown out of their seats.

Italy is building a high-speed line between Rome and Florence, called the Directissima. Austria is considering a high-speed line between Vienna and Saizburg, while Spain is planning one from Madrid to Barcelona

Compared with Europe, the United States is "simply not in the picture at all" when it comes to high-speed rail technology, SNCF's deputy director general, Raymond Monnet, said. But while that makes the United

States appear to be a tempting export market, European manufac-turers of high-speed trains recognize that they must overcome America's preference for automobile travel.

"We are still having a love affair with the automobile in this country, so all our calculations are very conservative," said John K. Lussi, director of rail marketing at the New York State Department of Transportation in Albany, referring to studies about the proposed

Such a service, with stops in Albany and Burlington, Vermont, would complete the 370-mile trip in about three hours, hitting speeds of train time between Paris and Brus-up to 160 miles an hour. Current sels from two hours 30 minutes to service on Amtrak trains takes eight hours.

French engineers say that 20 to 25 TGV trains would be needed for the service, costing a total of about speed track or improving existing track would add \$1.5 billion to \$2.1 billion to the bill. At least one train manufacturer

#### THE CITY OF JOY

By Dominique Lapierre. Translated by Kathryn Spink. 464 pages. 317.95. Doubleday, 245 Park Avenue, New York, N. Y. 10167.

#### Reviewed by Elisabeth Burniller

WESTERN writers are usually so horrified by Calcutta that they rarely get beyond their own reactions. The city and its millions of poor are described from above, sometimes vividly and passionately, but almost always from a Western frame of reference, in terms of population, rupees earned per day and causes of death. The descriptions often read as if the of death. The descriptions often read as if the writer has visited a slum, collected statistics, then left. That in itself is numbing, which may be one reason why there are so few good books

be one reason why there are so few good books on a city that haunts and confuses nearly everyone it touches. Even the most complete study up until now, Geoffrey Moorhouse's "Calcutta," treats the city's idiosyncrasies as quaint, and in the process, condescends.

"The City of Joy" breaks from this tradition. Lapierre did not just visit the poor, he spent three years researching and living among the residents of one of the worst shuns in one of the most impoverished cities on earth — and he succeeds in describing the poor from their own succeeds in describing the poor from their own point of view.

Until now, Lapierre has been the master, with his co-author Larry Collins, of a heavy-breathing style of contemporary history, turn-ing out the best-selling pot boilers "O Jerusa-lem," "Is Paris Burning?" and "Freedom at Midnight." But now, working alone, he has turned away from Mahatma Gandhi, Lord Mountbatten and the historical figures who dominated the Indian fight for independence in "Freedom at Midnight." This book, focuses on heroes of another kind, the anonymous poor. It has also put him on the best-seller lists in France, Italy and Spain, and its translation from French into English has been awaited in both the United States and India.

"The City of Joy" makes fascinating the commorplace events in the lives of the poor—from bathing in the streets to the massaging of babies to the (perhaps not as common the emasculation ceremony of a eunuch. Yet Lapierre moves beneath their simple existences and uncovers a nightmare of emotions and awful choices.

Selima, a desperate young mother, decides to sell her unborn 7-month-old fetus for use in a Western laboratory, even though she feels the abortion will be murder. "But then there were other voices too that haunted Selima in the night," writes Lapierre, "the familiar voices of her three other children crying out with hun-

#### Solution to Previous Puzzle

ger. At dawn she made her decision." She died of a massive hemorrhage during the operation of a massive hemorrhage during the operation Anand Nasar, translated as the "City of Joy," is a slum of 70,000 people in the borness of Calcutta, christened "either out of ignorance or deliance" by a jute factory owner. Here the fives of the three main characters as a Polish

of Calcutta, christened "either out of garanters or deliance" by a jute factory owner. Here the fives of the three main characters — a Polish priest, a rich young American doctor and a Bengali rickshaw puller — all connect.

The priest comes to devote himself to god and the poor. The doctor jonas him for a year, at one point fainting after he performs amputations on hundreds of lepers in the street, only to find, when he comes to, that a dog has carried off an arm. The rickshaw puller comes with his family to find work in Calcutta after his fields have been destroyed by drought.

Anand Nasar, three times the size of a football field, has "the densest concentration of humanity on this planet." Carbon dioxide and sulphur fumes kill at least one member of every family. The heat beats down eight months a year, only to be relieved by a monsoon that

year, only to be relieved by a monscon that makes alleys and shacks into "lakes of mud and excrement." Leprosy, tuberculosis, dysentery and hinger are rampant.

Yet in the midst of this, Lapierre finds that people transcend their condition, becoming models of humanity" who "know how to be tolerant of all creeds and castes, how to give respect to a stranger, how to show charity toward beggars, cripples, lepers and even the insane. Here the weak were helped, not trampled upon."

But Lapierre sometimes over-romanticizes the struggle of the poor (he continually refers to the slum as "the City of Joy"), diminishing their real pain and integrity. In one chapter, the priest is kept awake at night by the cries and groens of a young Muslim boy dying of osteomberculosis next door. He takes the boy a vial of morphine, but claime to find him so at peace — "How could such serenity radiate?" from that little martyred frame?" the priest asks himself — that he decides there is no need for the painkiller. Unless a miracle was occur-

for the paniciler. Unless a miracle was occurring, this sounds strange.

At another point, Lapierre approvingly quotes the doctor's father as saying that "a simple smile can have as much value as all the dollars in the world." One suspects the residents of the City of Joy might disagree.

Lapierre has also used long paragraphs of translated interviews that are too slick and too close to his own writing style to ring true. It is

close to his own writing style to ring true. It is musual to hear someone who buys blood from the poor of Calcutta exclaim, "Holy macker-el!" or to hear a rickshaw puller declare that "If you think it's easy-to get one of these jalopies moving, you've got another think coming."

Moreover, we are never told when the events in "The City of Joy" took place. There is a reference to the 1976 American Bicentennial, but 110 pages later India is setting off its first nuclear explosion, which occurred in 1974.

The sensation of floating between fiction and fact makes the book less effective than it

might have been. One of the characters dies the night of his daughter's wedding after going hungry to be able to afford it. The story would have had more impact if the reader could be

sure that it happened that way.

Yet "The City of Joy" is full of basic truths.

Who can forget the dying nickshaw puller selling his bones to a man who makes money from exporting skeletons, or the poor of Calcutta washing the body of a friend, and weeping during the riverbank cremation ceremony? This book contains great lessons of resilience and dignity, and of what is really important and dignity, and of what is really important when life is pared down to its essence. It will make anyone a little richer for having read it.

Elisabeth Bumiller is a Washington Post reporter based in New Delhi.

By Bob Oares

Los Ángeles Times Service LOS ANGELES — It was the third week of the National Football League reason, and the Chicago Bears were losing to the Minnesota Vikings, 17-9, late in the third quar-

Ouarterback Jim McMahon hadn't been acen. He had sat out the offensive practice during the week, pleading illness, and Chicago Coach Mike Ditka was using him to make a point to the team: no practice, no play,

With little more than a quarter left, Ditka swallowed his pride — the practice-is-beautiful lesson would have to be taught another way, another day - and sent his truent into the game.

McMahon's first play was a long pass for a touchdown. His second play was a long pass for a touch-

When he threw for a third TD, the Bears had converted probable defeat into a 33-24 victory. That performance was the most spectacular so far in the NFL's reg-ular season, which is eight weeks old and has eight weeks left. Since

McMahon's big night, things haven't been the same:

Chicago, winner of eight in a row under Ditka, has jumped past San Francisco, Miami, Dallas and the Los Angeles Raiders to become pro football's top team.

For the first time since the days of George Halas, the Bears are what Halas made them 50 years

ago, the intimidating Monsters of the Midway.

• McMahon is the NFL's new star. During two months of winning the free-spirited passer has caught up with such notables as Dan Marino, Joe Montana, Walter Payton, Eric Dickerson and Mar-

cus Allen.
McMahon has clearly been the most valuable player of the first half of the season.

QUEBEC - It's bad enough

from the Montreal Canadien poin

of view to lose to provincial rival

Quebec. What's worse is knowing

 Most other teams are laboring.
 A half-dozen hopefuls for Super Bowl XX - San Francisco, Washington, Seattle, St. Louis, Cincin- and New England, both 5-3.

nati, Pittsburgh - are at .500 or

Ditka calls Chicago "a complete tearn." The Los Angeles Rams are 7-1, mainly thanks to the leadership of Coach John Robinson and a big-play defense, but they're not ver a complete team.

The NFL's dominant characteristic has been a balance of strength. To date this season, 19 of the 28 clubs have parity-range records of 5-3, 4-4 or 3-5.

There are only three cellar franchises — Atlanta, Buffalo and Tampa Bay - and only six teams with records of 6-2 or better, among them the New York Jets. the surprise team of the American Conference East

In the 1980s, no club has been able to win two straight Super Bowls. The champion San Francisco 49ers. 18-1 last season, are cur-

The players are about even everywhere," said Ditka, "It's the opportunities - the breaks - that keep changing. A lot of the time, that's what makes the difference." Is there anything else?

An executive of one 500 team gives a terse summation of the NFL today: "The players are equal. The coaches aren't.

He contends that the playing tal-ent has been so evenly divided that most clubs have playoff potential.

They all spend \$500,000 or ...ore in each annual draft; they all build with the best material in college

The difference each week, he says, comes from coaches who can get that talent to play with the most intensity and concentration.

At halftime 1985, only three teams — Dallas, Denver and the Raiders - are winning the way they were expected to. All are 6-2

#### ijay Amritraj: India's Once and Future Tennis Hope Cessen who had held "You have to be a member of a club or a school. By Bob Greene That's why it's very difficult for us to compete." The Associated Press

Goulet: 'It's fun to be back.'

NEW YORK -- When told that Arthur Ashe had resigned as captain of the United States Davis Cup team, Indian tennis star Vijay Amritraj just shook his

reactive this year, (1) "I can't understand it," said Amritraj, referring to the U.S. Davis Cup squad, not to Ashe's resignation. "How can you not have your best players playing for your country?"

With John McEnroe and Jimmy Connors — America's top players — not on the team, the United States was eliminated by West Germany in this year's Davis Cup quarter mals. "It's such an honor to play for your country," said Amritrai, the captain of India's Davis Cup team and a player in the international team championships for the

Unlike the United States, India always fields its best players for Davis Cup. The problem, Amritraj admits, that India doesn't have that many world-class players - and those it does have are getting older.

This year, India's Davis Cup squad was made up of Amritraj, who will turn 32 in December; his brother Anand, 33; Shashi Menon, 33, and Ramesh Krishnan, the youngest at 24 and ranked 31st in the world. With Vijay and Anand Amritraj on the team, India

did reach the cup final in 1974, defeating the Soviet Union and Australia. But India boycotted the final against South Africa because of the South African government's apartheid racial policy.
In 1986, India again will be in the 16-nation world

group, which comprises the only countries actually competing for the cup.

"Whenever I play well, I figure the future of India's
Davis Cup team is in good shape," Amitraj said.

"Then, when I lose a match I should have won, or when I play poorly. I worry about the future of the

It was that worry that led Amritraj and his brothers, Anand and Ashok, to form a tennis training academy in Madras, India.

"I started to think about replacing myself on the team," said Amritraj, who once was ranked in the top reflects on all Indians." 20 worldwide. "There are no public tennis courts in India - nothing available for the average person to go tennis strokes, "And," Amritraj said, "they will not be allowed to have long hair or to put on torn jeans."

Teaming up with Britannia Industries Limited, the Amstraj brothers began a program to discover and develop young tennis talent in India. "We picked 30 boys under the age of 14. We, Anand

and myself, played with all of them, then picked the best eight — three from Bombay, one from New Delhi, one from Hyderabad and three from Madras. "Basically, we've taken over their entire lives. We moved them to Madras, where we have three coaches, two Americans and one Indian," Madras also is the

Amritrajs' hometown. The hopefuls are housed, and their diets and physical training are watched as closely as their tennis.
"Most important, their education is not being neglected," Amritra said.

The boys are all young, so we had to find somebody to take care of them, somebody to administer the academy." he added. "There was only one person I could think of to do it and had complete trust in — my mother. After all, she took care of the three of us, so what's cight boys?

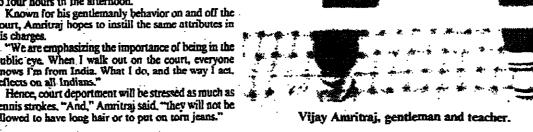

We picked the 14-and-under players because it gives them three years to get ready for the junior [tournament for boys at] Wimbledon. Their only commitment to us is that if they become good enough, they

nist play Davis Cup for India." In order for BAT — Britannia Amritraj Tennis — to become a reality, the Indian government also had to give its approval, since the boys will be admitted to the central school in Madras.

They will be studying what they want to achieve and what their parents want them to achieve," Amritrai said. "We will give them all the opportunity. They will be in special classes, and instead of attending games periods in the school they will be coming back early to the foundation to play tennis for at least three to four hours in the afternoon." Known for his gentlemanly behavior on and off the

his charges. "We are emphasizing the importance of being in the public eye. When I walk out on the court, everyone knows I'm from India. What I do, and the way I act.

court, Amritraj hopes to instill the same attributes in

#### ART BUCHWALD

### Raising Campaign Funds

WASHINGTON — A friend I said. "How does a senator know know, who earns a living try-how to vote when I can't tell him?" ing to persuade Congress to help protect the singles bar industry, told me that political fund-raising is getting out of hand on the Hill. He said, "Senator Doublechin called last week and asked me to contribute to his election cam-

paign. I sent over a check by messenger. This morning he morning he phoned again and wanted more money. Enough's

enough."
"Is it possible he forgot he called week?"

last Buchwald "He didn't forget. He's holding me up because he thinks I need

"Do you?"

"Perhaps. But he doesn't have to be greedy about it. I have other senators to feed as well." "Suppose you don't send him

any more money? What then?" "He won't answer my calls." "Would that be so bad?"

"It isn't just the calls. It means that he won't see me, and if he refuses to let me in his office how can I persuade him the government has to subsidize singles bars? When you donate money to politicians you're not buying their votes you're purchasing access to power so you can lay out your case," he

#### **Ashanti Throne** Returns to Ghana

Agence France-Presse
ACCRA, Ghana — A ceremonial Ashanti stool more than a century old, taken by the British as part of the spoils of victory in 1874. has been returned to the Ashanti

Britain and Ghana. The stool and other traditional regalia were looted by a British punitive force that sacked the

tribe after negotiations between

Ashanti capital of Kumasi in 1874.

"He has to see you? You're a U. S. citizen.

\*Senators and congressmen can only talk to so many people a day. They have no choice but to see the people who gave to their campaigns, as opposed to those who didn't."

'It sounds reasonable. But you told me that you already gave to Doublechin's election. Would he punish you because you didn't give

"That isn't the way Doublechin sees it. He claims he's in a neckand-neck light, and if I want to protect my first investment I have to give again. He intimated that if I didn't he would lose and then the singles bar industry would never have a friend in the Senate again."

"Did you send the money over?" "I was about to when Congressman Jingo called and asked me to make a donation to his campaign."
"When it comes to giving political money doesn't a senator out-

rank a congressman?" I asked. "No. sir. Congressman Jingo is chairman of the House subcommittee on singles bars." "Does he tilt toward your indus-

"Not yet, But the fact he called and asked for such a heavy contribution indicates he's not tilting the other way. I sent him the check without fear or favor."

"It's hard to believe our system of government depends on senators and congressmen stooping to plead for money over the phone."

"I've taken 250 calls this year. What happens is the legislator sets aside four hours a day and goes down a list his aides give him of every potential donor. They always call me because I control a political action committee fund. The singles bar owners forward the political action committee money to me and I dispense it to our friends."

"Don't you feel bad about subverting the democratic process?" "Not really. There wouldn't be a democratic process if we special interests didn't fund it. Every elect-The stool was sent back to En-gland by a Captain Jackson, whose swears to uphold the Constitution descendants returned it this year. It of the United States, as well as say

### Kent Gilbert, Japan's Best-Known Gaijin

By Terry Trucco

TOKYO—He is hardly an international celebrity, but in a recent recognition survey given high-school students throughout Japan. 95 percent identified the name and face of a boyish American attorney named Kent Gilbert.

When Kento, as he is known here, walks into a department store, people crowd around, whispering, pointing and waving papers for him to autograph. When he takes an afternoon run at Tokyo's National Stadium, passers-by stare and shriek. Fans dehuge him with mail, presents, even clothes. "I don't want it to come to the point where I have black glass on the car and get whisked from place to place, but there are some places I won't go now because I know it's not going to be fun for me," he admitted recently.

It is the typical treatment for a big-time entertainer here, and with almost two years of frequent guest appearances on Japanese tele-vision's most popular shows, Gilbert, 33, has joined the ranks of the nation's pop stars. Unlike his peers, however, his fame stems from the fact that he is a foreigner, with sandy hair, hazel eyes and a facility for Japanese. Gilbert is the most successful and unusual exponent of the gaijin talento, or for-

eign talent, who becomes famous not because

he can sing, dance or play baseball but because he can speak Japanese.
"Professional foreigners," as some call them, have been a staple of Japanese show business for years, turning up on talk shows and quiz programs. Last year, however, the genre took a new turn. No game show seemed complete without a gaijin or two. Entire programs were built around foreigners chatter-

ing in Japanese, sampling Japanese cuisine, even singing traditional Japanese songs. Reasons for peppering Japanese airwaves with foreigners vary, but most here agree the fad could flourish only in a nation as insular and homogeneous as Japan. In part the reason is simple curiosity. In certain areas here, Western faces are rarely seen, and foreigners fluent in Japanese are still considered an oddity. An appearance by an occasional Japanese-speaking foreigner also adds what some term a pleasantly international touch, providing a sense that Japan is part of the world community.

There are also a number of darker connotations. Many of last season's gaijin programs used foreigners as unwitting buffoons or "trained monkeys," as one observer here put it. Others reflected the feelings of national superiority that have blossomed with Japan's economy.

Television's fascination with foreigners has cooled somewhat this season, but Kent Gilbert is as ubiquitous as ever, popping up regularly on the game and variety-show circuit. He currently appears in a weekly drama series, delivers speeches before large groups and hosts a noontime radio show in Tokyo.

"Kento" Gilbert

He also does commercials for five different

"I think the gaijin boom is over, but I also think there's always the need for a few good gaijin," he said, seated in a conference room at the Tokyo law firm where he has worked for five years. "The Japanese will always want someone who can give them a perspective on themselves, who can tell them how they look. But they don't want just any old opinion. They want one or two gaijin in the media they can trust."

Gilbert thinks he has won that trust by carefully selecting the programs on which he appears. "What I do now is much like what a normal Japanese celebrity would do," he said. "I'm on programs with Japanese and answer the same questions as Japanese, but because I'm a gaijin, I have a different perspective and give people an opportunity to see how a gaijin approaches a situation."

It is hardly the life of the average Tokyo lawyer, American or otherwise, and Gilbert admits that as his popularity has risen, he has cut back his duties at his international law firm. "If I thought it would get this big, I

might not have done it," he says. His career in entertainment certainly did not start big. While appearing in a foreigners' amateur production here of "The Imaginary Invalid" two years ago, he learned that a apanese videocassette company needed a foreigner to make an English-language demonstration tape. He took the job, stepped onto the lowest rung of the talento ladder and before long landed a bit part in a television drama. "I was on for 20 seconds and was filmed in shadow. Everyone in my office watched, and no one could tell it was me."

popular game show on which celebrities guess the price of such one-of-a-kind exotica as African tribal masks and Indian headdresses. Recruited at the last minute when another foreigner had to cancel, Gilbert was a hit, playful and personable, with a good com-mand of Japanese. His well-scrubbed all-American looks also fit the traditional Japanese image of the foreigner; successful gaijin talentos are rarely burly he-man types — and almost never other Asians. Kento was asked back. "The first time I figured I'd just be speaking Japanese and making a little mon-ey," he said. "But the second time I was out to

Speaking Japanese was the easy part. Though he loathed languages as a high-school student in Utah, that changed when he took a crash course in Japanese in Hawaii in preparation for a two-year stint as a Mormon sionary in Japan. He continued his Japanese studies when he enrolled in Brigham Young University. "I wanted to work in a law firm on the West Coast, but the people with the most money have experience in Japan. My wife and I had two little kids and no assets. We were leaving nothing. And when I looked at my resume it said Japan, Japan,

Law and entertainment are not all that different, he added. "With both you try to persuade people. In law you're trying to persuade a judge or a regulatory authority, and that can be satisfying. But it's also satisfying to make 3,000 people laugh at something that really was quite clever.

The law career also lends him added credibility, even in a land wary of lawyers. "I like the fact that he's not a full-time talento," said a Japanese fan.

Being a top-ranked talento can also be profitable. Each spring after tax payments, the government releases names of the na-tion's highest paid. With an estimated income last year of more than 55 million yen (about \$260,000), Gilbert earned a respectable spot in Japan's pantheon of celebrities.

How long he will stick with the talento trade is the big question. "If I only go by law practice, I should go back to the States. There's nothing to learn after five years," he said. But can he give up show business? Gilbert admitted he has an agent in the United States, but doubted he would be as successful there. "When I was in high school, I thought a career in theater would be fun, but I didn't think I had the talent, and I still don't," he said.

In the meantime, he is considering all the options, not just the money, but "growth, family, happiness, experiences." And while he is doing that, Kent Gilbert can be seen almost nightly on television, the most famous foreigner in Japan.

## Relighting Liberty's Torch

Statue of Liberty at a centennial pers. celebration next July 3, according to Lee Iscocca, chairman of the Chrysler Corp., who also heads the Statue of Liberty-Ellis Island Foundation, lacocca promised the four-day event will be "heard and seen around the world." Reagan declared 1986 "The Centennial Year of Liberty in the United said Monday at a dedication core-said Monday at a dedication core-said Monday at a dedication core-mony. "Our studio is an American the United States," and Helen Haves is an the United States by France in 1886, has been undergoing a multi-million dollar restoration, and is now encased in 300 tons of aluminum scaffolding. Its old torch was removed 15 months ago. Also on July 3, Chief Justice Warren Burger will swear in 5,000 new citizens on Ellis Island, the immigration center closed in 1954, which is also including "Crime Without Passion of the state of his plays at the Astoria studio, center closed in 1954, which is also including "Crime Without Passion of the state of his plays at the Astoria studio, including "Crime Without Passion of the state of his plays at the Astoria studio, including "Crime Without Passion of the state of the state of his plays at the Astoria studio, including "Crime Without Passion of the state of the stat center closed in 1954, which is also being restored and 20,000 people will simultaneously take the cash will simultaneously take the oath across the United States, Iacocca said. On July 4, there will be an International Naval Review in cled with Hayes's 80th year in the York Harbor with navies show husiness. She began her cannot be the said of from up to 117 countries joining the U. S. Atlantic Fleet. Ships from of "The Royal Family." as many as 141 nations will be on parade in a Parade of Sails that may surpass the march of tall ships at the U.S. Bicentennial celebration in 1976, Iacocca said. Fireworks will be isunched from 30 barges in the harbor and the New York Philharmonic will perform in Central Park. There will also be free concerts July 4 and July 5 in New Jersey's Liberty State Park. The July 6 finale at the Meadowlands in New Jersey will feature fireworks and another concert, including Frank Sinatra, Lionel Ri-chie, Kenny Rogers and Willie Nel-
